

MAG

OUTER RING ASSEMBLY MACHINE

MAG 01

SEMI - AUTOMATIC OUTER RING ASSEMBLY MACHINE

½” - 3” 150-2500 ASME

4” - 8” 150-600 ASME

Painted, zinc-plated or SS rings

MAG01 is a must for all workshops that need to insert a SWG into an outer ring automatically.
The machine can manage both gaskets with or without inner rings and may process all standard and non-standard gaskets.
No more hammering, no more forcing the gasket into the outer ring.
Above all, a reliable and consistent machine to free the operator from a tiring process.

40+ years experience in gasket
manufacturing machines
