

MSG

SPIRAL WOUND GASKET MACHINES

MSG 07 A

**AUTOMATIC MACHINE
FOR PRODUCTION OF SWG**

1/2" - 30" ASME

**With and without inner rings
Oval gaskets are possible**

MSG07A is a TRULY automatic SWG MACHINE where the manufacturing process is managed by the machine from the beginning till the end. Filler loading, cut of wound materials, outer diameter dimension and weldings are TOTALLY managed in automatic by the machine.

MSG 09

**SEMI-AUTOMATIC MACHINE
FOR PRODUCTION OF SWG**

1/2" - 30" ASME

**With and without inner rings
Oval gaskets are possible**

Extremely flexible machine good for small quantities as well as bigger batches. The intervention of the operator for this machine is reduced to the minimum.

MSG 03

**SEMI-AUTOMATIC MACHINE
FOR PRODUCTION OF SWG**

300mm - 4000mm

**With and without inner rings
Oval gaskets are possible**

Easy interface, few regulations and high efficiency. Like all GSKET machines also MSG03 can wind gaskets directly onto inner rings and produce ovals.

MSG 04

**¾ AUTOMATIC MACHINE
FOR PRODUCTION OF SWG**

1/2" ASME - 4000 MM I.D.

**With and without inner rings
Oval gaskets are possible**

Best for service centers, MSG04 combines the necessity of a complete dimensional range in one machine with the requirement of precision and consistency. All this with the highest safety standards in its category.

 **Patented welder
and pressure device**

MSG 01

FULLY AUTOMATIC MACHINE FOR PRODUCTION OF SWG

1/2" - 10" ASME **NEW**

With and without inner rings
Oval gaskets are possible

The best version ever made of the most reliable and best-selling fully automatic swg machine is now reality. Old AISA generation machine has been further improved to this latest model that combines efficiency and user friendly interface.

MSG01 model comes in three versions for industrial, valve and automotive gaskets.

40+ years experience in
SWG manufacturing machines
